

Revisions from Version 1.1 to 1.2

Section	Revision
1.1	Minor.
1.2	Minor.
2.1	Dates of groundwater elevation measurement.
2.3	Minor.
2.4	Fault Rupture Study guidelines.
3.	Minor.
3.5	Structure foundations not to be used as any part of landslide remediation measure.
3.7	Major revision to Seismic Study.
3.11	Shallow Foundations: minor revisions to bearing/lateral capacity.
3.11	Deep Foundations
	(i) scour for earthquake loading conditions (per <i>BDS</i> 4.4.5.2)
	(ii) negative skin friction and Design Loading/Nominal Resistance
	(iii) driving resistance through scour/negative skin friction layers
	(iv) effect of temporary casings for CIDH piles
	(v) effect of undersized predrilling for driven piles
	(vi) passive soil resistance around the bent cap.
3.12	Major revision to Slope Stability Analyses.
4.1	Minor.
4.2	Minor.
5.1	Fault Rupture displacements to be noted in Contract Plans.
5.3	Spread Footing Data Table to be included in Report and Plans.
5.4	Signed As-Built LOTB to be included in Contract Plans.
6.	New Section: <i>Guidelines</i> Figures.
7.	New Section: <i>Guidelines</i> References.
